

# STRAIGHT WIRE

## CHORUS II

SPEAKER CABLE

### OFC Copper Conductors

For accurate, uncolored presentation

### Advanced Polypropylene Insulation

Delivers All to the Power and Signal

### Helical Quad Twisted Design

Produces authentic soundstage

**CHORUS II:** The first in-wall rated cable specifically designed for today's low resistance demanding high performance bi-wireable speaker systems. Four 12-gauge multi-strand conductors of OFC copper with advanced polypropylene insulation. Chorus II speaker cable provides tight, accurate bass with balanced higher register information that is presented without compromise. Power and control for maximum performance especially over long lengths. Combine opposing conductors (red and white) to positive and black/gray) to negative for standard speaker terminations. Matte gray jacket; 9.5mm (.375") diameter

ESSENTIAL UPGRADE OVER MANUFACTURER SUPPLIED CABLES
