

STRAIGHT WIRE

ENCORE II

ANALOG AUDIO INTERCONNECTS

OFHC Copper Conductors

for increased depth of stage

Super-Foam Polypropylene Insulation

preserves sonic nuances

Anti-Static Fiber Braid

provides dampening for reduced microphonics

Star-Quad Design

neutral, full balanced capability

Encore II utilizes OFHC conductors with the highest grade of Foam Polypropylene insulation for uncolored presentation with engaging vocals. Straight Wire's most advanced Star-Quad design, Encore II, provides realistic tight bass and true upper frequencies regardless of cable length. This cable's high compatibility with nearly all components make it a clear choice above the competition. Discover the significant improvement Encore II interconnect can make with today's top rated digital receivers and most separate components.

XLR (balanced termination available)

Clear jacket over red braid ; Diameter 7.5mm (.290")
