

STRAIGHT WIRE

MUSICABLE II

ANALOG AUDIO INTERCONNECTS

Oxygen Free Copper Conductors

for accurate signal transfer

Foam Polypropylene Insulation

preserves open soundstage

Dual Braid & Foil Shields

to reject distortion & external noise

Star-Quad Design

used in pro studios for long runs

Musicable II is a favorite for unleashing the potential of digital surround sound receivers, DVD and CD players, music servers, MP3 players, DVRs, subwoofers and other components. Its advanced polypropylene insulation in a balanced Star Quad design brings out the depth and subtleties from your favorite recordings. Dual shields are great at rejecting noise for long runs.

XLR (balanced termination) and **Telescopic** termination (tie the shield to ground at one end) are available along with standard RCA termination.
