

STRAIGHT WIRE

RHAPSODY S

ANALOG AUDIO INTERCONNECTS

OFHC Silver/Copper Conductors

for crystal clear details and imaging

Super-Foam Polypropylene Insulation

preserves sonic nuances

Anti-Static Fiber Braid

provides dampening for reduced microphonics

Advanced Helical Design

utilized for low electrical reactance

Rhapsody S was developed from a low resistance, helical design foundation employing six conductor groups, Silver coated OFHC copper delivers detailed articulation of all frequencies with luxurious musicality. Foam Polypropylene insulation encapsulates each group in a low dielectric environment. You'll enter a holographic soundstage just like the original recording venue. Acknowledged interconnect choice for the knowledgeable audio system builder, Rhapsody S delivers near reference grade performance at a reasonable price.

XLR (balanced termination available).

Clear jacket over blue braid; Diameter 9.6mm (.380")

LEVEL 3 - ADVANCED

INNOVATIVE TECHNOLOGY, HIGH RESOLUTION CABLES
